Project Design Phase-II Data Flow Diagram & User Stories

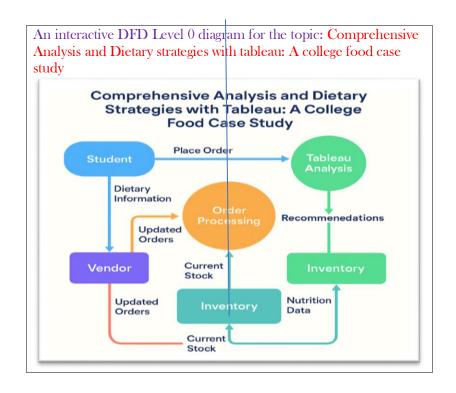

Date	10 th June 2025
Team ID	LTVIP2025TMID48638
Project Name Comprehensive Analysis and Dietary strategies tableau: A college food case study	
Maximum Marks	4 Marks

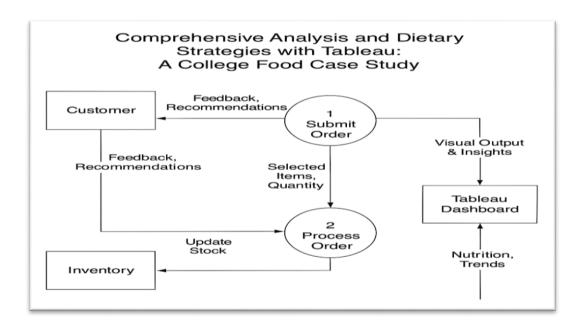

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flow system requirement graphically. It shows how data enters and leaves the system, what

Example: DFD Level 0 (Industry Standard)

hount of the

Entities:

- Customer (External Entity): The student or college user providing inputs such as food preferences, health data, or placing a food order.
- Inventory (Data Store): Contains available food items, ingredients, nutritional information, and stock levels.
- Tableau Analysis (Process): The core analytical system that processes and visualizes data.
- Order Process (Process): Handles selection, customization, and fulfillment of food orders.

This Level 1 DFD breaks down the core interactions and information pathways in a college-level dietary management system powered by Tableau, allowing for personalized dietary strategies and effective inventory control.

User Stories

Functional Requirement (Epic)	User Story Numbe	User Story / Task	Acceptance criteria	Priority	Release
Registration	USN-1		I can successfully create and log into an account.	High	sprint 1
		As a user, I can register by entering my name, email, and			
Data Input	USN-2	As a user, I can enter my daily food intake and mood.	I can save and view my input for each day	High	Sprint 2
Dashboard	USN-3	As a user, I can view visual reports of my food preference	Visualizations are es and calorie intake flect data	High	Sprint 3
Diet Suggestion	USN-4	As a user, I can get personalized dietary suggestion GPA	I receive a weekly meal recommendation.	Medium	Sprint 3
Feedback	USN-5	As a user, I can submit feedback about the food quality or dashboard usability	Feedback is stored and acknowledged.	Medium	Sprint 3
Dashboard Analytics	USN-6	As a researcher, I can analyze student dietary trends using Tableau dashboards.	I can filter data by gender, GPA, or dietary habit	High	Sprint 1
Export Report	USN-7	As a researcher, I can export visuals and summary reports for research publications.	Reports are downloadable in PDF and Excel format	Medium	Sprint 2
Data Comparison	USN-8	As a researcher, I can compare food trends across semesters or department	Comparative charts are generated from historical data.	Medium	Sprint 3
Food Inventory Insight	USN-9	As an admin, I can review and moderate data submitted s	I can approve or flag entries students that are inconsistent or inappropriate	High	Sprint 1
	Requirement (Epic) Registration Data Input Dashboard Diet Suggestion Feedback Dashboard Analytics Export Report Data Comparison Food Inventory	Requirement (Epic) Registration Data Input USN-2 Dashboard USN-3 Diet Suggestion USN-5 Feedback Dashboard Analytics Export Report Data Comparison USN-9	Registration Data Input USN-2 As a user, I can register by entering my name, email, and Data Input USN-3 As a user, I can enter my daily food intake and mood.
